PROPOSED DISCUSSION POINTS FOR EXAMINER'S INTERVIEW
REGARDING 10/773,999

Thursday, March 16, 2006 @ 2:00 p.m. E.S.T.

Claim 1: (Proposed Amendment) An apparatus comprising:
a seat mounted on a plurality of wheels;
a frame having a pair of longitudinal members each defining a wheel track, the longitudinal members retained in substantially parallel relation by a first and second end members, the first and second members coupled between the pair of longitudinal members, the frame to be disposed on an upper surface of a bath enclosure such that the pair of longitudinal members follows a long dimension of the bath enclosure.

Claim 6: Seat moves, not the back. This provides different functionality not possible with either Myers or Baker. Myers precludes lifting the seat and lifting the seat of Baker would dislodge it from the rails.

Claim 8: Myers has no slot over the front set of wheels at any point, but certainly not at the extreme end of range of movement – see e.g., Figure 1, elements 114 and 124, paragraph 16.

Claim 9: Stowable is not the same as removable. Stowable keeps the arm rests with the seat for ready access, but allows them to be out of the way when desired. The features are particularly important in the context of the physically challenged where having things within easy reach is necessary.

Claim 13: No pressure fit is present in Myers.
